BELL CHEMICAL CO.

DALLAS FT. WORTH HOUSTON SHREVEPORT OKLAHOMA CITY

SECOND EDITION FOR CHLORDANE

Read this and what to do. Point of sale. Check and review and other areas where insects are found.

For results, use BILCO in wet areas, especially in all types of buildings. BILCO should be thoroughly and repeatedly treated. For control of insects in areas where food is stored, use BILCO in areas where food is stored. BILCO should be thoroughly and repeatedly sprayed.

Carpenter Bees: Spray all articles to be protected. Pay particular attention to seams and folds. The use of BILCO is of utmost importance. Articles of clothing and bedding which have received treatment should be dry cleaned before use. The interior surfaces of storage containers, such as boxes and trucks, should be thoroughly sprayed. It is very important that all materials, including bedding on line in the area, be treated. The application should be repeated monthly unless the treated articles are stored in a moisture-tight container. For control of carpenter bees, special attention should be given to the treatment of the back of the building and the treatment of the area of the building surfaces and cracks in the walls and along the eaves.
