

[839-30]

DIRECTIONS: Area to be sprayed should be first thoroughly cleaned by removing all dirt and debris from cracks, crevices, pallets, shelves, as well as, on and around packages and stored food products. Close doors, windows and ventilators in the area to be sprayed and keep closed for 15 to 20 minutes after spraying. Do not remain in treated areas and ventilate the area after treatment is completed. Sweep up all fallen insects and place in trash receptacle.

BELCO G-P CONCENTRATE INSECTICIDE should be sprayed in the area in such a manner that a fine mist will settle in a thin film on all containers and packages sprayed. Also spray under and around all equipment, shelves and racks; into all cracks, crevices and corners, as well as, on ceilings, walls and floors.

BELCO G-P CONCENTRATE INSECTICIDE should be sprayed once a week as a regular procedure. During the Summer, however, spraying should be conducted twice weekly. Where there are severe infestations, daily spraying may be necessary. For maximum penetration, we recommend using a Belco Fog Electric Sprayer.

"Classified by Underwriters' Laboratories, Inc. as to fire hazard only. Belco G-P Concentrate classed 20 to 25 between paraffin oil and kerosene in respect to fire hazard. See UL Index of Classified Products.

Trade Mark

BELCO G-P CONCENTRATE INSECTICIDE is a high quality contact insecticide exclusively formulated for use by wholesale grocers, food jobbers and packers, poultry processing plants, candy companies, carbonated beverage bottlers, seed firms and similar food and drink industries. BELCO G-P CONCENTRATE INSECTICIDE may be sprayed around packaged nuts, fruits, candies and other similarly packed food. It is to be used for the control of flies, roaches, exposed stages of flours moths, ants, silverfish and certain other insects.

CAUTION: Harmful if swallowed. Do not spray into bulk candy, dried fruits, nuts, or open cartons of food products. Do not use or store near heat or open flames. In food processing plants, foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

CONTAINER DISPOSAL: Do not reuse empty 1-gallon or 6-gallon containers. Destroy by perforating or crushing. Bury or discard in a safe place. Do not reuse empty drums. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.
