

TO CLEAN, DEODORIZE AND DISINFECT TOILET BOWLS: On initial cleaning, apply BELCO STERICLENE full strength with a Bell Chemical constant gauge spray nozzle. This will clean the rim and on down sides. Let water run for 10 minutes, then scrub thoroughly with a brush and rinse thoroughly. For routine use, BELCO STERICLENE may be diluted with equal parts of water and sprayed thoroughly throughout.

For use in below water closets, apply BELCO STERICLENE full strength to the bowl and to stand for 30 minutes, depending upon the amount of dirt. For extra cleaning, scrub with the Bell Chemical brush. For routine use, BELCO STERICLENE may be diluted with equal parts of water and sprayed thoroughly throughout. For use in below water closets, apply BELCO STERICLENE full strength and allow to stand for 30 minutes. For extra cleaning, scrub with the Bell Chemical brush. For routine use, BELCO STERICLENE may be diluted with equal parts of water and sprayed thoroughly throughout. For use in below water closets, apply BELCO STERICLENE full strength and allow to stand for 30 minutes. For extra cleaning, scrub with the Bell Chemical brush. Water

Steri-Clene is a powerful disinfectant and deodorant. It is used for the sanitation of rooms, corridors, and other heavy traffic areas.

It is also used for the sanitation of floors, walls, and ceilings. It is especially effective against bacteria and viruses.

### WARNING

Avoid contact with eyes and skin. If contact occurs, flush with water immediately. Do not inhale fumes.

## BELL CHEMICAL CO.

BELCO STERICLENE may be used safely on most surfaces. It is especially effective on metal, wood, and masonry surfaces. Surfaces are rinsed off after cleaning.

TO CLEAN AND SANITIZE CERAMIC TILE SHOWERS AND REMOVE MILDEW AND FUNGI: On initial application use a Belco #357 Nylon Bowl Brush to apply solution of 1 part of BELCO STERICLENE and 1 part water to walls and floor. A solution of 1 part BELCO STERICLENE to 1 part of water may be agitated in a bucket to a suds or foam, and the foam then applied with brush as above. Allow to soak 3 minutes, scrub thoroughly, and rinse with clear water. BELCO STERICLENE mixed with 3 parts water may be used for routine sanitation.

For disinfection of floors, walls, and ceilings, use a solution of 1 part BELCO STERICLENE to 10 parts water. Allow to remain on surface for 10 minutes. Flush with clear water. Do not use on marble or polished surfaces. Use with caution on painted surfaces. See label for attention.
