## NON-SELECTIVE WEED KILLER

Kills Poison Oak, Poison Ivy, Grasses, Annual and Perennial Weeds and is Toxic to all Vegetation

BELCO N-T WEED KILLER is a non-selective weed killer. It kills all vegetation, including annual and perennial weeds, grasses, and broadleaf plants. It is highly effective and easy to use.

**NOTE:** BELCO N-T WEED KILLER is a non-selective weed killer. It kills all vegetation, including annual and perennial weeds, grasses, and broadleaf plants. It is highly effective and easy to use. Extreme care should be exercised in its use to prevent injury to desirable plants, trees, and shrubs. It should not be used where there is danger of the material being leached into the root area of desirable plants. Do not use on treated areas where the residual effect is undesirable. The use of BELCO N-T WEED KILLER may keep treated soil unproductive for several months and should be used with care to avoid injury to desirable plants.

**CAUTION:** BELCO N-T WEED KILLER is a non-selective weed killer. It kills all vegetation, including annual and perennial weeds, grasses, and broadleaf plants. It is highly effective and easy to use. Extreme care should be exercised in its use to prevent injury to desirable plants, trees, and shrubs. It should not be used where there is danger of the material being leached into the root area of desirable plants. Do not use on treated areas where the residual effect is undesirable. The use of BELCO N-T WEED KILLER may keep treated soil unproductive for several months and should be used with care to avoid injury to desirable plants.
