**A Non-Selective Herbicide for control of annual and perennial weeds and grasses on industrial sites.**

## DIRECTIONS

**ROBINS BOR-M** is a combination of sodium borates and 3-p-chlorophenyl 1,1 dimethylurea and formulated especially for dry application to the soil. It is a granular free-flowing material and can be applied by hand broadcasting or a machine spreader, such as a fertilizer spreader, etc. It is non-flammable, non-volatile and easy to use. Best results are obtained from an even distribution - even as to spread and uniform as to quantity. Recommended for control of most annual and perennial weeds and grasses on non-crop land.

# ROBINS BOR-M Granular

ACCEPTED  
Jan 28, 1972  
UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO. 842-105  
*Lawrence*

**Non-Selective Weed Killing Compound For Dry Application**

THIS MATERIAL IS DESIGNED PRIMARILY FOR INDUSTRIAL WEED CONTROL TO DESTROY MOST ANNUAL AND PERENNIAL WEEDS AND GRASSES ON INDUSTRIAL SITES, HIGHWAY AND RAILROAD RIGHTS-OF-WAY, PETROLEUM INSTALLATIONS AND SIMILAR SITES WHERE A WEED-FREE SOIL IS DESIRED.

### Notice

This material is not selective in action and may be toxic to all types of vegetation and may render the entire treated area totally or partially unproductive for one or more years. Care should be taken to confine the use or application to the particular area intended to be treated and to avoid its contact with lawns, trees, shrubs, crops and other desirable plants which are not intended to be destroyed or injured. This includes precautions in treating areas which may be underlaid by roots of adjacent valuable growths. Careless applications of this material, or washing by water run-off, to areas where desirable plants are growing or which will be used for later planting may result in injury to desirable plants. Do not contaminate water used for irrigation or domestic purposes. Mechanical equipment should be thoroughly cleaned after use.

### Annual Weeds

Apply 1/2 to 1-lb. **ROBINS BOR-M** per 100 sq. ft. of soil surface. Applications should be made before seedlings appear or when they are young and tender, and most susceptible to chemical action. When applied to the soil, it will give non-selective control for an extended period of time. Length of residual action is dependent on rainfall and soil type. In arid regions, applications should be made just prior to the rainy season.

### Active Ingredients

Disodium Tetraborate Monohydrate 93.0%  
(Na<sub>2</sub>B<sub>4</sub>O<sub>7</sub>·H<sub>2</sub>O)  
(Boron Trioxide (B<sub>2</sub>O<sub>3</sub>) equivalent 58.5%)

Monuron (3-(p-chlorophenyl)-1,1-dimethylurea) 4.0%

### Inert Ingredients

3.0%  
100.0%

U.S.D.A. Reg. No. 842-105

## CAUTION!

### KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May cause irritation of eyes, nose, throat, and skin. Avoid breathing dust. Avoid contact with skin, eyes, and clothing. In case of contact, flush with plenty of water; for eyes, get medical attention. Wash hands thoroughly after using. Avoid contamination of feed and foodstuffs.

Do not re-use empty container. Destroy by burying in a safe place.

See side panel for additional cautions.

### Perennial Weeds

Apply 1 to 2-lbs. **ROBINS BOR-M** per 100 sq. ft. during the fall, winter or early spring months to get best results. Fall applications are preferable for deep-rooted perennials. Late spring and summer applications are not generally recommended because rains are frequently irregular and may be insufficient to dissolve this material for early and effective results.

Because of the many varying conditions affecting use and application, such as location, seasonal weather, soil composition, and type of vegetation, manufacturer makes no representation or warranty with respect to results or effects of such use whether or not used or applied in accordance with directions herein contained. Neither manufacturer nor seller makes, and their employees and agents are not permitted to make, any representations or warranties, express or implied by law, not specifically set forth on the label. Complete elimination of weeds is not guaranteed. The buyer accepts this material subject to these terms and assumes all risk of usage and handling. It is advisable to consult agricultural experiment station or extension service weed specialists on specific problems.
