

MEYER'S SPECIAL FOR MICE

Net Weight — 12 lbs.

DANGER

Active Ingredients: Strychnine Sulphate 0.5%

Inert Ingredients: 99.5%

DIRECTIONS: Remove all food, clean premises, and close up any holes for protection against mice. Put a teaspoonful of Special for Mice in many small dishes (caster cups, box covers, etc.) and set them where mice are known to run, but not in locations accessible to children, pets, and domestic animals — or put the poisoned grain in tamper-proof bait boxes. Repeat as often as necessary. Pick up uneaten bait a few days after all mouse activity ceases.

DANGER: Strychnine Sulphate is deadly poison. Keep out of reach of children and away from FOOD, FEED, and PETS.

ANTIDOTE: In case of accidental poisoning call a physician at once. Give emetic—half ounce mustard in 8 ounces warm water. Chloroform relieves spasms.
