

# MEYER'S

# LINDANE

Meyer's Lindane Spray has a residual effect that remains up to two weeks after application - an invisible film is deposited which kills ants, clothes moths and carpet beetles that walk or rest on the treated surface. Repeat treatment as often as necessary.

For ants: Concentrate on the treatment of their trails and the area around doors, sills, and window frames where they enter the premises. It is advisable to treat the openings from waterpipes, heat ducts, electrical outlets and baseboards where ants may come out into rooms from wall spaces and partitions.

For "Pantry Pests": For such pests as the saw-toothed grain beetle, or granary weevils, inspect food cabinet for dry cereals, dried fruits and nuts to find the package which is the source of the infestation. Burn it, contents and all. Then remove all food and shelf paper. Spray the shelves lightly, the cracks between the edges of the shelves and the sides of the closet heavily. When dry, replace shelf paper and foodstuffs.

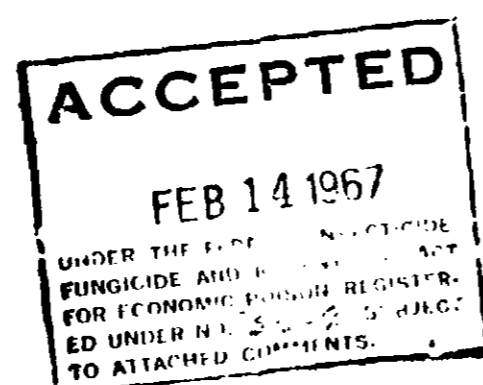

## SPRAY

Clothes Moths and Carpet Beetles: Do not use on Furniture or Clothing, as Continued Contact with the Human Skin May Be Hazardous. However, the vapor toxicity of Meyer's Lindane Spray makes it advantageous to use as an aid in controlling these pests in closets by spraying the baseboards and other cracks, and then closing the closet for at least 24 hours. Similar results can be obtained by spraying the interior of trunks. For rugs and carpets, spray both top and bottom of the edges to a depth of 6 to 12 inches from the outside. It is also advisable to treat rug pads in the same fashion.

Areas where furniture is stationary, or left unmoved for long periods of time and the space beneath is kept dark by long skirts or slipcovers, are particularly susceptible to moth attack and the upper surface of the rug should be treated.

ACTIVE INGREDIENTS: 100%  
Gamma isomer of benzene hexachloride (from lindane) .5%  
Petroleum Distillate 99.5%

**CAUTION**  
KEEP OUT OF REACH OF CHILDREN.  
See additional cautions elsewhere on label

**CAUTION: DO NOT POUR, SPILL, OR STORE NEAR FIRE OR FLAME.** Avoid contamination of foodstuffs and inhalation. Contact with skin and eyes may cause irritation. In case of skin contact, wash with plenty of soap and water. For eyes, flush with water for ten minutes, and get PROMPT medical attention. Harmful if swallowed. Do not use on household pets or humans. May be absorbed through skin. Do not use on linoleum or asphalt tile, as the solvent may make these materials "tacky". Apply this product only as specified on this label.
