

DUZITALL
GERMICIDAL CLEANER
 CLEANER - DISINFECTANT - DEODORANT

SANITIZER-BRIGHTENER

CONTAINS EXCLUSIVE "BRITCOL A"*

A multipurpose product designed for use as a cleaner and general broad spectrum disinfectant in industrial plants, hotels, motels, schools, factories and homes or wherever a broad spectrum germicide cleaner is required.

ACTIVE INGREDIENTS.

Soap 15.25%, Potassium o-Benzyl-p-Chlorophenate 4.82%, Isopropanol 2.76%, Essential Oils 0.20%, Sodium Dodecylbenzene Sulfonate 0.09%, Tetrasodium Ethylenediaminetetraacetate 0.08%.

* **INERT INGREDIENTS:**..... 76.80%

* Includes cleaning agents, wetting agents and color brightener.

ACTIVE DETERGENTS OVER 20%

Phenol Coef. 6 A.O.A.C. (S. Typhosa)
8 A.O.A.C. (S. Aureus)

WARNING: KEEP OUT OF REACH OF CHILDREN

SEE BACK PANEL FOR FIRST AID AND OTHER PRECAUTIONS

Kills a wide spectrum of both gram positive and gram negative organisms including the anti-biotic resistant Staphylococcus aureus.

ACCEPTED

 FEDERAL BUREAU OF INVESTIGATION
 FUNGICIDE AND DISINFECTANT ACT
 FOR RECORDING POISON REGISTER
 ED JUN 18 1974

CLEANING, SANITIZING, DISINFECTING - Use the following dilutions according to the method of use: When preparing solution, first pour germicidal cleaner into pail, then add water. At all times a clean mop should be used.

When cleaning and disinfecting badly soiled areas, allow solution to remain on surface for 3 to 5 minutes and agitate with a brush or mop. Change mop water as often as necessary and keep mops clean.

MOPPING - Use 1½ to 3 ounces per gallon of water. On terrazzo tile, marble, linoleum, hardwood or similar floors, wet floors in large areas. The longer the solution remains on the floor the easier it is to remove the dirt. Mop, vacuum, or squeegee dirty solution from floor.

SPONGING - Use 1½ to 3 ounces per gallon of water. Painted walls, automobiles, metal cabinets, furniture and similar surfaces. For walls and cabinets start sponging from bottom working upwards, covering small areas only.

WIPING - Use 1½ to 2 ounces per gallon of water. Painted or varnished woodwork, furniture and other similar surfaces. Wet cloth with solution and wipe surfaces. Frequently wring cloth out in solution. Wipe with dry clean cloth.

DEWAXING - Use one pint per gallon of water. Allow solution to remain on waxed surface for 5 to 10 minutes. Scrub, then wipe up immediately with dry mop.

SPRAY METHOD - Use 2 to 5 ounces per gallon of water in pressure sprayer. Instead of mopping large areas this solution may be used in sprayer. In pressure sprayer, spray large areas, allowing solution to stand a few minutes. Remove soiled solution from cleaned areas with vacuum, squeegee or a wet mop wrung out in clear water.

RINSING - If surface is left streaked, rinse with clear water, keeping mops clear. Areas that are mopped frequently need not be thoroughly rinsed after each cleaning.

EXTREMELY GRIMY AREAS - Use 1 to 2 pints per gallon of water, on scuffed gym floors or greasy cement. Apply to small areas and rinse the especially soiled spots after the solution has been used, to avoid streaking and to obtain a uniform lustre.

OTHER USES - For disinfecting and cleaning sick rooms in industrial plants, use a minimum of 1½ ounces of disinfectant cleaner in one gallon of water. For washing gas masks or respirators soak objects in above solution for 10 minutes. For disinfecting cuspidors, wash thoroughly in above recommended use dilution.

Disinfecting of water closets requires expelling the residual water over the trap prior to application of the above mentioned disinfectant solution. If desired, add one ounce of undiluted, full strength disinfectant cleaner to the residual water in the bowl so as to do away with expelling the water which is in the bowl.

For sanitizing or disinfecting swimming pool surfaces during cleaning operations and on walks or surfaces around swimming pool areas use 1½ ounces of disinfectant cleaner per gallon of water. Rinse thoroughly after cleaning.

RINSE EMPTY CONTAINER WITH WATER AND DISCARD

WARNING: KEEP OUT OF REACH OF CHILDREN

WARNING: Causes eye or skin irritation. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of water. Avoid alcohol. Call a physician immediately.
