# CAUTION: - COMBUSTIBLE MIXTURE

N. Y. C. FIRE DEPARTMENT PERMIT No. X158663

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME

**KEEP OUT OF THE REACH OF CHILDREN**

HARMFUL IF SWALLOWED

REMOVE OR COVER EXPOSED FOOD BEFORE SPRAYING

When used in accordance with the following directions this specially compounded insect spray produces outstanding results in apartment houses, industrial plants, cafes, restaurants, food stores or warehouses, flour mills and meat packing plants.

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using this product in these areas, apply only when the facility is not in operation.

Remove pets, birds and cover fish aquariums before spraying.

Complies with the provisions for synergized pyrethrins as set forth in List of Chemical Compounds authorized for use in 1974 under USDA Poultry, Meat, Rabbit and Egg Products Inspection Program.

## DIRECTIONS

For indoor use only. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**TO KILL FLIES, MOSQUITOES AND GNATS:** Close room and discharge spray mist vigorously in all parts of room, using about 2-3 ounces for each 1000 cubic feet of space. Leave room closed for 10-20 minutes. Repeat when needed. Do not remain in treated areas. Ventilate the area after treatment is completed.

**TO KILL CLOTHES MOTHS, CARPET BEETLES:** Spray all articles to be protected giving particular attention to folds and seams. Spray carefully from a distance of two or three feet so that only a mist like vapor comes in contact with material being sprayed. Interior surfaces of storage containers such as closets, chests and trunks should be regularly sprayed. For the control of carpet beetles thoroughly treat baseboards, rugs and carpets, cracks in floor, in corners and under furniture where the insects tend to congregate and cause damage. Treatment for clothes moths or carpet beetles should be repeated every thirty days unless articles are stored in moth tight containers.

**TO KILL FLEAS (infesting premises):** Remove and destroy animal's bedding and spray sleeping quarters freely, forcing the spray into all cracks in the floor and around the room. Spray floor coverings as well as the floor. Repeat treatment as often as necessary.

**TO KILL ROACHES, WATERBUGS, SILVERFISH:** Apply liberally in all cracks and crevices in woodwork, underneath sinks, dark places behind pipes and in all places where insects may infest, contacting as many insects as possible. Repeat application as often as necessary.

**TO KILL BED BUGS:** Springs and mattresses should be sprayed thoroughly after the bed has been dismantled, paying particular attention to cracks, crevices, tufts and seams on mattresses, wall paper that is loose, loose molding and any places where these bugs are likely to hide. Repeat treatment as often as necessary.

**TO KILL ANTS:** Use spray so as to wet as many insects as possible, thoroughly treat runways, door sills, window frames, and other points of entry.

**TO KILL THE FOLLOWING ACCESSIBLE STAGES OF GRANARY INSECTS:** granary weevils, rice weevils, indian meal moths, angoumois grain moths, grain mites, confused flour beetles, sawtooth grain beetles, red grain beetles and cadelles. Wet surfaces thoroughly and treat all infested surface areas, insect hiding places and insect runways at rate of one gallon of this material on 750 square feet of area - equivalent to spraying to point of run off. Repeat when needed.

Do not reuse container. Destroy when empty.
