

DIRECTIONS FOR USE:

Apply undiluted as a course spray to infested surfaces until wet, moving spray stream rapidly enough to prevent excessive wetting of surfaces and waste of material. Direct spray away from people, plants, and pets. Avoid excessive wetting of plastic, rubber, and asphalt surfaces such as tiles and floor coverings. Do not allow the small, finger operated, plastic attachment-type sprayer to remain in Green Light Roach & Ant Killer solution for extended periods as the plastic sprayer may be damaged.

Ants, Cockroaches, Crickets, Silverfish, Spiders, Scorpions, and Waterbugs Indoors: Spray into cracks, crevices, around baseboards and other places where these insects hide. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. Repeat as needed. Do not spray foodstuffs or house plants. Remove pets and cover fishbowls before spraying. Do not allow children to contact treated areas until surfaces are dry.

Brown Dog Ticks: Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

Ants, Clover Mites, Crickets, Earwigs, Fleas, Flies, Millipedes, Mosquitoes, Sowbugs, and Brown Dog Ticks Outdoors: Spray infested areas thoroughly including outside surfaces of screens, doors, window frames, foundations, patios, or other places where insects may enter. For ants spray hills and runways. Repeat as necessary. Do not spray vegetation.

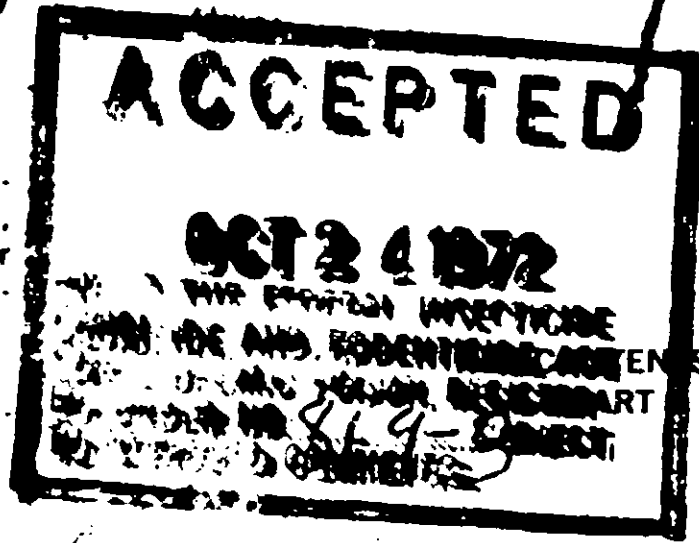

NOTE: Avoid wetting asphalt tile, rubber tile, and plastic materials with spray. Do not allow children and pets to contact sprayed surfaces until completely dry.

CAUTION: May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided. Wash thoroughly with soap and warm water after handling. Avoid contamination of food, utensils, and food preparation areas. In cases of illness, get prompt medical aid.

To Physician: Atropine sulfate is antidotal.

FLAMMABLE: Do not spray into or near open flame. Do not smoke while using.

TO SPRAY REMOVE PLASTIC CAP AND THROW AWAY

ROACH and ANT KILLER

KILLS RESISTANT ROACHES

ALSO KILLS: *Ants, Brown Dog Ticks, Crickets, Earwigs, Fleas, Flies, Millipedes, Mosquitoes, Scorpions, Silverfish, Sowbugs, and Spiders.*

In addition to rapid kill, it stays on treated surfaces and kills insects 1 to 2 weeks after spray deposit has dried. Spray only on surfaces. Do not use as a space spray.

CAUTION: Keep Out of Reach of Children

See other cautions on back panel. Flammable.

ACTIVE INGREDIENTS:	
Isopropylphenyl methylcarbamate	1.0%
Petroleum Distillate	83.7%
INERT INGREDIENTS	
	15.3%
Total	100.0%

*U.S. Pat. No. 3,111,538 Canadian Patent No. 725,204
