CAUTION** See Side Panel For Additional Precautionary Statements

Contents One Quart (0.946L)
Net Weight 2.8 lb (1.27 kg)

HOTLINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact National Pesticide Information Center at 1-800-858-7378 for general information and/or medical information.

ENVIRONMENTAL HAZARDS:

Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

STORAGE AND DISPOSAL:

Storage: Do not contaminate water, food, or feed by storage or disposal. **Disposal:** If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Shake well before diluting with water. Shake well before diluting with water. Dilute Green Light Root Stimulator and Starter Solution with water at the rate of 3 1/2 tablespoons per one gallon of water.

Use from 1 to 8 pints of diluted Green Light Root Stimulator and Starter Solution per plant depending upon size. For example: 1 pint of the mixture on mums, geraniums, and other annual flowers. For rose bushes and other 2 or 3 foot plants such as azaleas, gardenias, and camellias, use 3 pints per plant. For larger than 4 foot plants, such as trees and large shrubs, use 1 gallon or more of the mixture per plant depending on size.

Pour diluted solution over the soil as the roots are being covered, making sure that the roots are wet with the solution. Wet soil around plant with water after planting.

Repeat in 2 or 3 weeks if necessary by pouring diluted Green Light Root Stimulator and Starter Solution on soil around transplanted plants.

GUARANTEED ANALYSIS

Total Nitrogen (N) 5%
5% Ammoniacal Nitrogen
Available Phosphate (P₂O₅) 20%
Soluble Potash (K₂O) 10%
Derived from: Diammonium Phosphate, Ammonium Polyphosphate, Potassium Hydroxide, and Muriate of Potash.
Chlorine, not more than 3%
