

DIRECTIONS FOR USE

Shake well before diluting with water.

Dilute Green Light Root Stimulator and Starter Solution with water at the rate of:

- 1 Pint in 9.5 gallons of water, or
- 1 Quart in 19 gallons of water, or
- 1 Gallon in 76 gallons of water.

Use from 1 to 8 pints of diluted Green Light Root Stimulator and Starter Solution per plant depending upon size. For example: 1 pint of the mixture on mums, geraniums, and other annual flowers. For Rose bushes and other 2 or 3 foot plants such as Azaleas, Gardenias, and Camellias, use 3 pints per plant. For larger than 4 foot plants, such as trees and large shrubs, use 1 gallon of the mixture per plant.

Pour diluted solution over the soil as the roots are being covered, making sure that the roots are wet with the solution. Wet soil around plant with water after planting.

Repeat in 2 or 3 weeks if necessary by pouring diluted Root Stimulator and Starter Solution on soil around transplanted plants.

**CAUTION: KEEP OUT OF REACH OF CHILDREN
HARMFUL IF SWALLOWED.
AVOID GETTING IN EYES.**

Do not contaminate water by cleaning of equipment, or disposal of wastes.
Apply this product only as specified on this label. Leave in original container.
Do not reuse container. Destroy when empty.
