Each 1/2-pound box is divided into 2 parts and contains 1/4 lb. Rose Care with Systemic in each compartment. There are 3 general classes of roses: bush roses, climbers, and small polyantha roses. Use 1/4 lb. Rose Care for bush roses, 1/2 lb. for climbers, and 2 ozs. for small polyantha roses.

Treat in spring when new foliage appears and repeat at 4- to 6-week intervals during growing season.

Water soil to a depth of 3 to 4 inches before applying Rose Care. Tear perforated tab open at top and side of box. Sprinkle this amount on soil under bush rose. Open other side of box to treat next bush rose. Use less for small polyantha roses, and more for climbing roses, as suggested above. After applying Rose Care with Systemic insecticide, water treated area thoroughly to get plant food with systemic down to rose roots. Do not apply this Rose Care with Systemic insecticide to soil over root feeding areas of fruit trees or vegetables or any other food crops. Never feed roses just before frost. If Rose Care gets on leaves, wash it off to prevent burning.

WARNING: Poisoning may occur as a result of exposure. May be fatal if swallowed. May be absorbed through skin. Do not breathe dust. Do not get on skin, in eyes, or on clothing.

Do not contaminate feed or foodstuffs. Keep out of reach of children. Wash thoroughly after handling. Keep children and pets off treated areas until product is worked into the soil and treated areas have dried completely.

Contains organic phosphate insecticide (inhibits cholinesterase).

Antidote: atropine sulfate.

If swallowed induce vomiting. Call physician. Conditions of use are beyond seller's control. Seller's liability is limited to product's replacement or purchase price refund. Seller makes no warranty, express or implied, concerning product's use beyond claims on carton.
