

ACTIVE INGREDIENTS:

Asphalt	28.0%
Petroleum Distillates	33.0%
INERT INGREDIENTS	39.0%
Total	100.0%

DIRECTIONS FOR USE

Shake well before using. After roses, shrubs, and trees are pruned, spray the ends of the pruned branches or limbs thoroughly to prevent water, fungus diseases, and insects from getting into the open area. If the trunk or large limbs are injured by some mechanical device, or hail, or borers, or sap sucker birds, spray the open wound thoroughly at first sign of the injury. This will allow the wound to heal and prevent wood rot.

CAUTION: Harmful if swallowed. Avoid getting spray on skin, clothing or shoes. Keep out of reach of children. Avoid getting spray on buildings, fences, sidewalks, driveway and the like.

WARNING: Flammable! Contents under pressure. Do not use near fire, sparks, or flame. Do not puncture or incinerate container. Exposure to temperatures above 130° F may cause bursting.

NOTE: To prevent clogging of spray nozzle, immediately after using and before storing, turn spray can upside down and press spray button until spray stops. Then put cap back on spray can and store can upside down.
