

GREEN LIGHT BULB & BEDDING PLANT FOOD

This plant food contains 3 primary foods, 3 secondary foods, and 6 minor foods in a friable form which releases the minor plant foods slowly over a long period of time. It also contains a soil fungicide which will aid in preventing bulb rot, stem rot, root rot (Phytophthora) and (Phytophthora) which are soil diseases that attack ornamental bulbs and bedding plants, causing them to die. Phytophthora is particularly destructive to perennials.

DIRECTIONS FOR USE

Apply one pound of this food with fungicide to 20 square feet (area 2 ft. wide and 10 ft. long) of planting bed. Work this food into the top 2 to 3 inches of soil and then plant ornamentals, bulbs or bedding plants. Repeat the application of plant food with fungicide at 30-day intervals during growing season of plants. Always water treated flower bed thoroughly after applying the food.

WARNING: Do not use on other crops used for food or forage. Use only according to label directions. Applications at rates above those shown may result in illegal crop residues. Do not treat food crops grown in the greenhouse.

Do not contaminate feed or food. Keep out of reach of children. Wash hands, arms, and face thoroughly with soap and warm water after use and before eating or smoking. Wash all contaminated clothing with soap and hot water before reuse.

GREEN LIGHT BULB & BEDDING PLANT FOOD

GREEN LIGHT BULB & BEDDING PLANT FOOD

This plant food contains 3 primary foods, 3 secondary foods, and 6 minor foods in a highly concentrated form which releases the minor plant foods slowly over a long period of time. It also contains a soil fungicide which will aid in preventing bulb rot, stem rot, root rot (Phythora) and (Phytophthora) which are soil diseases that attack ornamental bulbs and bedding plants, causing them to die. Phytophthora is particularly destructive to petunias.

DIRECTIONS FOR USE

Apply one pound of this food with fungicide to 20 square feet (area 2 ft. wide and 10 ft. long) of planting bed. Work this food into the top 2 to 3 inches of soil and then plant ornamental bulbs or bedding plants. Repeat the application of plant food with fungicide at 30 day intervals during growing season of plants. Always water treated flower bed thoroughly after applying the food.

CAUTION: Do not use on other crops used for food or forage. Use only according to label directions. Applications at rates above those shown may result in illegal crop residues in not treat food crops grown in the greenhouse.

Do not contaminate feed of food. Keep out of reach of children. Wash hands, arms and face thoroughly with soap and warm water after use and before eating or smoking. Wash all contaminated clothing with soap and hot water before reuse.
