U.S.D.A. Reg. No. 869-100

Controls perennial grasses such as Bermuda grass, Johnsongrass, quackgrass, and bluegrass
grasses such as watergrass, annual bluegrass, and foxtails in driveways, flagstone walks, in
courts around buildings, along and under fences, around bases of trees, and edging walks or
Can be applied with sprayer, sprinkling can, or hose on sprayer.

DIRECTIONS FOR USE

MIXING: When level full the enclosed scoop contains 2 1/2 ounces or 2 level tablespoonfuls
sprayer or sprinkling can, full of recommended water, then add recommended amount of
until dissolved, then add remainder of water.

WHEN TO APPLY: Apply spray when grasses are actively growing but before seed stalks
all foliage thoroughly to the point of run off. Re spray as necessary.

GRASS CONTROL - OVER-ALL TREATMENT: Use 12 scoops (8 ounces) Dowpon in 6 gallons
1000 square feet. Apply with sprayer or hose on sprayer to wet the grass without extensive run
off.

SPOT TREATMENT: Use 4 scoops (2 1/2 ounces) Dowpon per gallon of water. Spray to wet gr
pumpup or backpack sprayer. With a hose on sprayer, 1 pint or quart capacity container,
Dowpon in one pint of water and apply to wet at a 1 to 8 volume ratio. With a sprinkling can,
Dowpon per gallon water and apply to wet the grass. **DO NOT DRENCH OR APPLY EXCES**
grasses close to established tree trunks using 2 scoops Dowpon per gallon of water. Apply
grass using a pumpup sprayer. Do not soak the area. Do not use around small shrubs, newly
or trees less than 4 years old.

WEED-GRASS CONTROL IN DICONDRA LAWNS AND IVY (California) Controls Berm.
young stages of annual bluegrass and crabgrass. 1. Apply to mature dichondra. **NEVER** on n
or newly transplanted areas. 2. If lawn has not been fertilized, apply fertilizer and then
5 to 7 days before applying Dowpon. 3. Apply in spring and summer when weed grasses are
Green. 4. Apply to leaf portions of weed grasses in a fine mist spray. Use a minimum of water
to wet foliage as a light rain would do. 5. **DO NOT** soak the soil. Use a sprayer with an inset
to produce a fine mist. A watering can is unsatisfactory. 6. **For Spot Spraying:** Use 1 level sco
Dowpon per 5 quarts of spray. Apply as directed in (1), through (5) above. 7. **For Over all C**
spray solution to evenly distribute 2 ounces to 1000 square feet of turf area. The amount of
vary depending on type of sprayer used. Usually one to two gallons of water is sufficient
square feet.
