DIRECTIONS FOR USE

IMPORTANT:
Read these entire Directions and Conditions of Sale before using.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals, and or residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller, Green Light Company and the Buyer, and the Buyer, and the Buyer, and the Buyer, subject to the understanding that the Buyer assumes all such risks.

Apply any time weeds are growing vigorously. If ground is very dry, moisten before applying. For best results water thoroughly 1 to 2 days after applying. Apply when air is quiet to avoid possibility of spray drift. If top growth is high, it is desirable to cut off this growth before applying. This product when used as directed may not control deep-rooted perennials.

Mix 1 quart Green Light Com-Pleet in 2 gallons of water and apply to 80 square feet or 1 gallon in 8 gallons of water and apply to 320 square feet.

A flower sprinkling can or compressed air sprayer is satisfactory for applying the spray. Hold sprinkling can about waist high to get good foliage coverage when applying mix. Re-apply in two days on plants not previously killed. NOTE: Do not use the sprinkling can or compressed air sprayer for watering or applying fertilizer or applying other pesticides to foliage of desirable plants after it has been used to apply Com-Pleet.

WARNING: Harmful if swallowed. Do not get in eyes. Causes eye irritation. Avoid contact with skin or clothing. May cause skin irritation. In event of contact, wash skin with soap and plenty of water. For eyes, flush immediately with plenty of water for at least 15 minutes and obtain medical attention. Do not wear contaminated clothing again until it has been cleaned.

Do not permit this to come in contact with flowers, shrubs, trees, or other valuable plants. Coarse sprays are less likely to drift. Do not spray over areas where soil may contain roots of desirable shrubs and trees. To avoid injury to desirable plants, do not apply other chemicals with the same container or equipment used for Green Light Com-Pleet.

DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME. Do not store near fertilizers, seeds, insecticides, or fungicides. This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not reuse container. Destroy by burying in a safe place. Do not burn.
