**PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** May be harmful if swallowed. Avoid breathing dust. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. In case of contact with skin or eyes, flush with plenty of water; for eyes, get medical attention. Wash with soap and water after handling and before eating or smoking. Wear clean clothing. Avoid contamination of feed and foodstuffs.

**STATEMENT OF PRACTICAL TREATMENT IF SWALLOWED:** Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention immediately.

**IF INHALED:** Remove person from dust area. Call a physician.

**IF ON SKIN:** Wash promptly with soap and water.

**IF IN EYES:** Flush eyes with cold water. Get medical attention.

**NOTE TO PHYSICIAN:** Carbaryl is a moderate reversible, cholinesterase inhibitor. Atropine is antidotal.

**ENVIRONMENTAL HAZARDS:** For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

This pesticide may be fatal to dogs or other pets if eaten. Keep pets out of treatment area.

**DIRECTIONS FOR USE:** It is a violation of federal law to use this product in a manner inconsistent with its labeling.

To control sowbugs, pillbugs, crickets, snails, slugs, cutworms, armyworms, earwigs, and grasshoppers in the lawn, flower beds, ornamental and home vegetable garden. Sprinkle bait LIGHTLY on the ground where pests are found, giving particular attention to edges of walks, flower beds, vegetable gardens, and along foundation of house and porch. Best results will be obtained if the bait is applied in late afternoon or evening because most of the above pests feed late in the evening and at night. For best results, water area to be treated before applying bait. Do not put bait out in piles. Scatter it so the bait can hardly be seen on the ground or grass.

The bait is stomach poison and works slowly. Results will be apparent in 1 to 3 days after applying. Repeat the application at four or five-day intervals until satisfactory control is obtained. One pound of bait will treat approximately 500 square feet except for vegetable gardens.

**VEGETABLE GARDENS:** On beans, eggplant, potatoes, tomatoes, cabbage, lettuce, beets, turnips, spinach and strawberries, to control cutworms, armyworms, crickets, sowbugs, snails. For home gardens apply on ground between rows 1 pound of bait per 1100 square feet or 11 rows 100 feet long with a band treatment of bait 1 foot wide. Avoid getting bait on vegetables. Do not use bait within 3 days of harvest around cabbage, lettuce, beets, turnips and strawberries; nor within 14 days of harvest around beet tops, leaf lettuce, spinach and turnip tops.

**STORAGE:** Store in a locked storage area out of reach of children and domestic animals. Store in original container. **PESTICIDE DISPOSAL:** Securely wrap original container in several layers of newspaper and discard in trash. **CONTAINER DISPOSAL:** Do not reuse container. Rinse thoroughly before discarding in trash.
