

Measuring Scoop Inside

LAWN RENOVATION IN CALIFORNIA AND ARIZONA: Mow dead vegetation if present. Wait two weeks for new grass growth, then spray thoroughly using 1/2 pound Dowpon in 4 gallons water per 1000 square feet. After 2 to 3 weeks water at least 15 minutes each day for 1 week. Wait for 4 to 6 weeks to seed, plug, or spring.

WARNING: To avoid injury to desirable plants, do not allow spray or spray drift containing Dowpon to contact foliage or roots of such plants, including lawns or other desirable turf. Do not use close to ornamentals or fruit trees. Dowpon in the soil may inhibit seed germination and plant growth for 30 days or more, depending on dosage, soil type, temperature and rainfall. Accordingly, on land to be planted to grasses and garden crops, delay planting for at least 30 days.

CAUTION: Causes irritation of eyes, may cause skin irritation. Avoid contact with skin, eyes, or clothing. In case of contact, flush eyes with water for at least 15 minutes and get medical attention. For skin, remove grossly contaminated clothing and wash skin with plenty of water. Wash clothing before re-use. Keep out of reach of children.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of **Merchantability or Fitness for a Particular Purpose**, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
