Not Reviewed. Registrant claims to be in accordance with  
the registration of Federal Product Guidance for Phase 2  
Insecticides. Page 2, 12. Active to Inert Change in Status.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)**

**CAUTION**

May be harmful if swallowed. Avoid contact with eyes, skin and clothing. Avoid breathing vapors or spray mist. Keep away from food, feedstuffs and domestic water supplies. Wash thoroughly after handling.

**ENVIRONMENTAL HAZARDS**

This product is highly toxic to bees exposed to direct treatment or residues on plants. Protective information may be obtained from your Cooperative Agricultural Extension Service.

This product is toxic to fish, birds, and other wildlife. Do not apply to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as listed on this label.

**PHYSICAL OR CHEMICAL HAZARDS**

Do Not Use or Store Near Heat or Open Flame. Do Not Store Below 32 degrees F. AGRICULTURAL CHEMICAL - Do Not Ship or Store With Food, Feeds, Drugs or Clothing.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**READ AND FOLLOW COMPLETE DIRECTIONS FOR USE.**

General Information: Green Light Imported Fire Ant Killer forms an emulsion when diluted with water and is suitable for use in all conventional hand-sprayer or sprinkler cans.

**STORAGE AND DISPOSAL**

<b>STORAGE:</b>	Keep away from food, feedstuffs, and domestic water supplies. Keep container closed. Store out of reach of children and pets.
<b>DISPOSAL:</b>	Do not reuse empty container for any purpose. Wrap container in newspaper and put in trash collection.

Treatment of fire ant mounds. Apply GREEN LIGHT IMPORTED FIRE ANT KILLER as a drench diluted at a rate of 2 fl. oz. (4 Tablespoons) per one (1) gallon of water. Gently sprinkle a total of one (1) gallon of the diluted solution over the surface of each mound using a sprinkler can. Thoroughly wet mound and surrounding area to a 4 ft. diameter (12 sq.ft.). For best results apply in cool weather, 65-80° F., or in early morning or late evening hours. Treat new mounds as they appear. Pressurized sprays may disturb the ants and cause migration, reducing product effectiveness.

Treatment of potted, containerized and balled and burlapped nursery stock. Use GREEN LIGHT IMPORTED FIRE ANT KILLER to control imported fire ants in soil attached to roots of these plants by completely submerging the ball of soil in a tank containing GREEN LIGHT IMPORTED FIRE ANT KILLER diluted at the rate of 8 fl. oz. per 25 gallons of water. Do not remove burlap wrap or plastic containers with drain holes prior to submerging. Keep soil submerged until complete saturation has occurred, normally 30 seconds. Wear rubber gloves, boots and apron during this operation. An alternate treatment to submerging potted plants is to apply a solution containing GREEN LIGHT IMPORTED FIRE ANT KILLER (8 fl. oz. per 25 gallons water) as a substitute for plain water during routine watering activities. This solution should be applied to the point of run-off on a twice daily schedule for three consecutive days. Do not remove burlap wrap or container from plants prior to treatment. Application should be made in a well-ventilated area.
