## DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Mix Pro Kleen with water (preferably 90 to 120°F.) at 1:30 to 1:40 and stir until it is in solution. The product is immediately ready to be foamed. The foam produced with the Foamall Units at 60 psig is of good volume and clings well. Allow the foam to remain on the surface to be cleaned until the soil is loosened. Then rinse well with a strong impingement water spray.

Pro Kleen should be foamed at a 1:30 to 1:40 dilution. At this level it is an effective hard water protein scale remover. Lesser concentrations can be used for lighter soil and stronger concentrations for heavier soils.

**USING PROCEDURE FOR SANITIZING**—Pro Kleen is an effective acid sanitizer. Use 1 part Pro Kleen to 200 parts water (2 1/2 ounces/4 gallons of water) for final acid sanitizing on food contact surfaces.
