DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Flies and Mosquitoes: Close all doors, windows and transoms. Do not remain in treated areas and ventilate the area after treatment is completed. Spray freely upward and in all directions. Fill room with vapor. If insects have not dropped to floor in 3 minutes, repeat spraying as quantity sprayed was insufficient. After 10 minutes, doors and windows may be opened. To aid in prevention of breeding, spray on standing water and in garbage pails.

Spiders, Ants: Wet all cracks and crevices with spray, holding sprayer close to cracks and crevices. When crawling insects appear, wet them with spray holding sprayer close to insects. Repeat twice daily for several days, then less frequently to prevent breeding. For controlling ants, spray along trails and areas around door sills and window frames, repeating application as required.

Cockroaches: Thorough and repeated spraying of the infested area should be done, hitting as many of the cockroaches as possible. Pay particular attention to spraying into cracks, crevices, baseboards, and other hiding places.

OTHER USES

Livestock Treatment — To kill horn flies, stable flies and houseflies at the time of application on horses, cattle and hogs, apply about 2 ounces of spray per head daily. Do not soak animal's skin. Apply as a mist spray only. Repeat application as necessary.

Premises Treatment — To kill houseflies and stable flies in cattle barns and stables, fill room with mist. Keep doors and windows closed for at least 10 minutes. Repeat treatment as necessary.

Stainless when properly used. Non-corrosive and non-deleterious to equipment, machinery and utensils. Remove or cover exposed foodstuffs while spraying. After spraying, thoroughly wash all surfaces contacted by spray with a detergent solution and rinse with potable water. Do not apply as a space spray in food processing areas when these areas are in operation. Regular treatment and good housekeeping are essential for insect control.
