For toilets — It is not necessary to remove the water from the bowl. One (1) ounce is sufficient to remove soils, rust, lime, scale and uric deposits, disinfect and deodorize. Open flip cap, invert bottle and, with light pressure, direct stream of at least 1 ounce completely around underneath side of toilet bowl rim. Wet bowl mop with solution and swab all surfaces above and below the water line including under the rim, seat and lid. Allow at least 10 minutes contact time for surface to be cleaned and disinfected. Rinse. Repeat application for cleaning heavily encrusted deposits.

On Solid Porcelain Urinals — Place bowl mop over drain. Add enough water to make a solution and follow the same procedure as for toilet bowls. D'Germ will not damage solid porcelain china or vitreous ware.

Shower Stalls — Glazed or other ceramic tile may be cleaned without damage. To clean and disinfect glazed ceramic tile and other hard, non-porous surfaces, use 1 ounce in a gallon of water, allow 10 minutes contact time for surface to be cleaned and disinfected, rinse thoroughly.
