

GOLD CREST®

RODENTICIDE PF-1

WEATHER RESISTANT RODENTICIDE FOR CONTROL OF COMMENSAL RATS INDOORS AND OUTDOORS

CAUTION

Keep out of the reach of children, pets, wildlife and domestic animals.

GOLD CREST RODENTICIDE weatherproof bait should be placed in tamperproof bait boxes or in areas which are inaccessible to children, pets, wildlife and domestic animals.

If swallowed by human beings, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such cases, intravenous and oral administration of vitamin K combined with blood transfusions is indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin (Dicumarol).

IN ALL CASES OF HUMAN INGESTION IMMEDIATELY NOTIFY A PHYSICIAN.

IMPORTANT

For best results, keep this product in a closed container, free from odors which may contaminate the bait and reduce acceptability.

Rats may feed several times before the effects are noticed. Several days may be required for death to occur.

CONTAINER DISPOSAL

Do not reuse empty container. Destroy by perforating or crushing. Bury or discard in a safe place.

NOTICE

Because Velsicol Chemical Corporation has no control over storage, handling, and conditions of use, which are of critical importance, Velsicol Chemical Corporation makes no representation or warranty, either express or implied, for results due to misuse, improper handling or storage of this material. Nor does Velsicol Chemical Corporation assume any responsibility for injury to persons, crops, animals, soil or property arising out of misuse, improper handling or storage of this material.

FOR PROFESSIONAL PEST CONTROL USE ONLY

DIRECTIONS FOR USE

This product can be used in wet or damp locations such as riverbanks, railroad tracks, loading areas, in or around rat holes, under granaries, along fences, garbage dumps, etc.

All outdoor placements must be made in tamperproof boxes.

This product is equally effective in dry areas such as the insides of buildings and other protected areas. Place baits in tamperproof bait stations along walls, in corners and in concealed locations where rats can feed undisturbed.

Bait placements should be checked daily to make sure that an uninterrupted supply of bait is available. Maintain an uninterrupted supply of bait for at least 15 days. Continue baiting until all signs of feeding have stopped.

RATS: Place baits 20 to 30 feet apart. At least 4 ounces of bait should be used per location.

Bait placements should be kept permanently to prevent new infestations.
