DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

USE	BRUSH/TREE	DOSAGE	APPLICATION
Pastures, rangeland and noncrop-land areas such as fence rows, high-ways, utilities, railroads, and pipeline rights of way, waste-land and similar areas.	Eastern persimmon	Use 1 heaping teaspoonful of BANVEL [®] X.P. pellets per inch diameter of the trunk of the plant. (Example: Use 3 teaspoonfuls for a tree with a trunk 3 inches in diameter.)	Scatter the pellets evenly on the ground within 6 inches of the trunk. Apply BANVEL [®] X.P. pellets any time after buds start to open and before the leaves and branches stop growing in the summer.
	Creosotebush Tarbrush	Use 1 heaping table-spoonful of BANVEL [®] X.P. pellets per 4 feet di- ameter of canopy.	Make application just prior to or in the early part of the rainy season. Scatter the pellets uni- formly under the canopy of the shrub.
	Salt Cedar	Use 50 to 100 pounds of BANVEL [®] X.P. pellets per acre (5 to 10 lbs. di- camba acid equivalent).	Make application just prior to or in the early part of the rainy season. Apply BANVEL [®] X.P. pel- lets uniformly over the area to be treated.

IMPORTANT

Do not apply BANVEL[®] X.P. pellets under desirable trees or other plants, or areas where their roots might extend, or where BANVEL[®] X.P. pellets might be washed into the root area. Do not contaminate domestic or irri- gation waters. Pasture and rangeland grasses may be grazed or harvested for dairy feed (green or dry) 60 days after treatment. There is no waiting period between treatment and grazing for animals other than dairy ani- mals. Do not graze meat animals in treated fields within 30 days of slaugh- ter. To avoid injury to desirable plants, equipment used for BANVEL[®] X.P. pellets should be thoroughly cleaned before reuse to handle or apply any other agricultural chemical. The dosage required for control of these brush-type plants will temporarily stunt or eliminate the growth of desir- able grasses in the treated areas.
