This product can be used in wet or damp loca-  
tions such as river banks, railroad tracks, load-  
ing areas, in or around rat holes, under granaries,  
along fences, garbage dumps, etc.

All outdoor placements must be made in tamper  
proof boxes

This product is equally effective in dry areas such  
as the insides of buildings and other protected  
areas

Place baits in tamper proof bait stations along  
walls, in corners, and in concealed locations  
where rats can feed undisturbed

Bait placements should be checked daily to make  
sure that an uninterrupted supply of bait is avail-  
able. Maintain an uninterrupted supply of bait for  
at least 15 days. Continue baiting until all signs  
of feeding have stopped

**RATS:** Place baits 20 to 30 feet apart. At least  
4 ounces of bait should be used per  
location

**MICE:** Place baits 6 to 10 feet apart. Use 1/4 to 1/2  
ounce of bait per location. Larger place-  
ments (up to 2 ounces) may be needed  
at points of very high mouse activity

**Bait placements should be kept permanently  
to prevent new infestation.**
