VELSICOL CHEMICAL CORPORATION

14372 300 AAF 341 East Ohio Street • Chicago, Illinois 60611

CAUTION

Keep out of the reach of children, pets, wildlife and domestic animals. Treated baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamperproof bait boxes. Do not contaminate water by disposal of wastes. Apply this product only as specified on this label.

If swallowed by human beings, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such cases, intravenous and oral administration of vitamin K₁ combined with blood transfusions, as indicated, is in the case of hemorrhage caused by overdoses of bis-hydroxy coumarin derivatives.

IN ALL CASES OF HUMAN INGESTION IMMEDIATELY NOTIFY A PHYSICIAN.

IMPORTANT

For best results, keep this product in a closed container free from odors, which may contaminate the bait and render it unacceptable. Rodents may feed several times before the effects are noticed. Several days may be required for death to occur.

CONTAINER DISPOSAL

Do not reuse empty container. Destroy when empty.

DIRECTIONS FOR USE

This product can be used on wet or damp ground, such as grain fields, railroad tracks, loading areas, and around rat holes, in or around buildings, along fences, garbage dumps, etc.

This product is equally effective in dry areas, such as the inside of buildings and other protected areas.

Treated baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamperproof bait boxes.

Place baits along walls, in corners, or concealed locations, such as burrows or in runways where rats and mice feed, water and travel.

For Norway and Roof Rats, place one to four bait packs per placement. Placements should be made at 15 foot intervals.

For House Mice open the bait pack and place 1/4 to 1/2 ounce of bait at each placement. Placements should be made at 6 to 10 foot intervals.

RODENTICIDE FOR USE ONLY BY PROFESSIONAL APPLICATORS

DIRECTIONS FOR USE

This product can be used in wet or damp locations such as river banks, railroad tracks, loading areas, in or around rat holes, under granaries, along fences, garbage dumps, etc.

This product is equally effective in dry areas such as the insides of buildings and other protected areas.

Treated baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamperproof bait boxes.

Place baits along walls, in corners, in concealed locations, next to burrows or in runways where rats and mice feed, walk, and travel.

For Norway and Roof Rats, place one to four bait packs per placement. Placements should be made at 15-foot intervals.

For House Mice open the bait pack and place 1/4 to 1/2 ounce of bait at each placement. Placements should be made at 6 to 10 foot intervals.

Maintain bait supply for at least 15 days. Continue baiting until all signs of feeding have stopped. Bait placements should be checked daily and replace consumed, contaminated or spoiled baits. The baits being replaced should immediately be disposed of in a safe manner to prevent ingestion by children, pets, wildlife and domestic animals.

This product is not to be used in or around homes, schools, hospitals, nursing homes, or other places where people live or work.
