

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION

Avoid contact with eyes. Wash hands after use. Avoid contamination of food or feedstuffs.

STATEMENT OF PRACTICAL TREATMENT
IF IN EYES: Flush with plenty of water. If irritation persists, get medical attention.

ENVIRONMENTAL HAZARDS
 Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS
 Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° may cause bursting. Never throw container into fire or incinerator.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake Well Before Using!

ROOST No More—is a compound spawners, pigeons and starlings find disagreeable underfoot. Birds prefer to land on something they can grasp rather than a flat surface. Treat only the natural landing places, such as edges of window sills, roof edges, gutter edges, tops of eaves, ornamental copings, and ledges.

TO OPERATE AEROSOL CAN:—Shake well before using! Lift protective cap. Invert can and push nozzle to any side. Move can over area to be treated with an even stroke.

PREPARATION OF SURFACE:—Remove all nests. Use wire brush to clean surface. On porous material such as stone, use water-proof silicone base material, an undercoating of paint or masonry tape to form a water-repellent penetration of surface. Surface must be clean and dry.

Do not apply in rainy, damp weather or below freezing temperatures. Do not apply at locations where the user has concern that domestic birds may become entangled in the product.

HOW TO APPLY:—Move can with an even stroke SLOWLY which will leave a ribbon of ROOST No More other gases have dissipated. This ribbon to be applied along the top of signs, roof ridges, structural iron, eaves, wall tops, etc. 1/2 inch from the edge of the ledges, sills, etc. Treat wall tops as ledges. Rain gutters need a ribbon along the outer lip and a broken line across the downspout. Birds sometimes even shoot their mark in landing and slide further in. Additional "lines of defense" should be laid where space requires. For pigeons these ribbons should be three (3) inches apart and for starlings and sparrows two (2) inches apart. If affected areas are beyond safe reach, consult your building cleaner, painter, touchpainter or roofer.

Avoid contamination of food or livestock feed.

DISPOSAL
 Do not reuse empty container. Wrap container and put in trash collection.

LIMITED WARRANTY AND LIABILITY

NOTICE: Read this Limited Warranty and Liability before buying or using this product. If the terms are not acceptable, return it at once unwrapped.
