ENVIRONMENTAL HAZARDS

Do not apply directly to lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. BANVEL CST is a specially formulated product for controlling undesirable trees and their sprouts in forest and non-cropland areas such as along fence rows, drainage ditch banks and rights-of-way. This product requires no dilution or mixing and can be applied directly to freshly cut surfaces of trees such as:

- | | | |
|------------|----------|--------------|
| ailanthus | dogwood | persimmon |
| alder | elm | poplar |
| ash | fir | sassafras |
| aspen | gum | serviceberry |
| basswood | hawthorn | sourwood |
| birch | hickory | sumac |
| cedar | hornbeam | sweetbay |
| cherry | maple | sycamore |
| cottonwood | oak | willow |

IMPORTANT

Do not contaminate irrigation ditches or water used for domestic purposes. Do not apply to areas where the possible downward movement into the soil or surface washing may cause contact of BANVEL CST with the roots of desirable plants. Desirable plants, such as trees and shrubs, may also be affected by root uptake of herbicide from excretion by the roots of nearby treated trees. Therefore, do not use BANVEL CST close to desirable plants unless possible injury can be tolerated.

Do not apply using equipment which may cause spray drift onto sensitive crops or other desirable broadleaf plants. Use very low pressure or gravity flow equipment only. (continued on right panel)
