

GENERAL INFORMATION

All surfaces to be sanitized should be thoroughly cleaned before using BONCHEM STA-CHLOR solutions.

BONCHEM STA-CHLOR is recommended for the sanitizing of equipment in milk, ice cream, cheese and butter plants, dairy farms, meat packers, poultry packers and food processing plants.

BONCHEM STA-CHLOR is recommended for chlorination of butter and cheese rinse water. Also for sweet water tanks.

For further information please contact our representative or office.

WATER CHLORINATION

For wells, cisterns and pond water, use 1 oz. to approx. 1000 gals. water. This will give approx. .5 PPM. With approx. 15 hours retention period, this will sanitize the average water. In extreme cases, use 1½ oz. to approx. 1000 gals. water.

BONCHEM STA-CHLOR is quick acting, leaves no sediment or film; and may be used very effectively in water temperatures up to 212 degrees Fahrenheit, without losing strength due to heat.

FOR TREATMENT OF COOLING AND RETORT WATER — use 1 oz. per 100 gals. water. This will yield 5 ppm or less. Do not exceed this concentration. For further details see the application bulletin for Retort Water Treatment.

STA-CHLOR

A SANITIZER FOR FOOD PROCESSING PLANTS AND EQUIPMENT

ACTIVE INGREDIENT:

Sodium Hypochlorite . . . 6%

INERT INGREDIENTS: . . . 94%

TOTAL 100%

CAUTION: Keep out of reach of children. See side panel for further cautions.

ONE U.S. GALLON

DILUTION TABLE *ppm=parts per million

PPM	STA-CHLOR	WATER
100	1 Oz.	4½ Gal.
150	1 Oz.	3 Gal.
200	1 Oz.	2¾ Gal.
1000	5 Oz.	2¾ Gal.

Consult local or state health authorities, wherever necessary, for concentrations required.

RECOMMENDED

INSTRUCTIONS FOR SANITIZING

Spraying: Use 200 parts per million chlorine (1 oz. per 2¾ gallons of water). Immersion or Flowing Methods: Use a solution of 100 parts per million chlorine, (1 oz. per 4½ gallons of water). Test solution in use to make certain concentration does not fall below 50 parts per million. If tests cannot be made, start with 200 PPM.

Over The Road Milk Tankers: Wash clean then sanitize with a BONCHEM STA-CHLOR solution of 100 PPM concentration.

CAUTION

Irritating to eyes, skin and lungs. Do not add acids or acid detergents to Bonchem STA-CHLOR solutions.

HARMFUL IF SWALLOWED
