BONCHEM CRYSTAL CHLOR

DIRECTIONS

SPRAY SANITIZING

Use 1 oz. BONCHEM CRYSTAL CHLOR per gallon of water, (250 parts per million available chlorine) on clean, rinsed equipment, allow a minimum contact time of 5 minutes and drain. Allow equipment to drain before using.

PASTING

Where used as a paste cleaner allow equipment to drain and rinse with a potable water.

IMMERSION OR FLOW SANITIZING

Use 1 1/2 oz. BONCHEM CRYSTAL CHLOR per 3 1/2 gallons of water (100 parts per million available chlorine) on clean, rinsed equipment for a minimum contact time of 2 minutes. The BONCHEM CRYSTAL CHLOR solution should be tested and kept above 50 parts per million available chlorine. Drain equipment.
