# PINE OIL DISINFECTANT

**CAUTION: KEEP OUT OF REACH OF CHILDREN** \_\_\_\_\_Gallon

Phenol Coefficient 5 A.O.A.C. Against Salmonella Typhosa  
By Official A.O.A.C. Phenol Coefficient Method

## COMBINATION DISINFECTANT, CLEANSER AND DEODORIZER

Active Ingredients: Pine Oil, Soap..... 90%  
Inert Ingredients: Water..... 10%

CS-125, when used as a disinfectant, has certain advantages over the coal tar and common disinfectants, in that it is non-corrosive, does not injure cloth, metals, etc., is comparatively inexpensive, is not appreciably affected by organic matter, and has a pleasant odor.

CS-125 is an excellent disinfectant to use for general purposes around the school, institution, public building, etc. It should never be used for personal hygiene purposes or for the treatment of wounds, cuts, etc.

### DIRECTIONS

For best results, use 1 part CS-125 to 40 parts of water. A half-pint of CS-125 to the average ten-quart scrub-pail full of water makes the proper solution for disinfecting, scrubbing and cleaning.

Harmful if swallowed. Cease use if irritation develops. Avoid contact of material with skin and eyes. **ANTIDOTES:** Internal—Give raw egg white, milk, mucilage, gruel or cornstarch paste, and follow with emetic of mustard. Call a physician. External—Flush eyes with copious quantities of water for 15 minutes. For skin contact, wash with water or alcohol.

## Crystal Cresylic Disinfectant

This material is intended for official disinfection of cars, boats, other vehicles, feeding stations, stock yards, pens and other premises which have been used in the transportation or housing of cattle, sheep, swine or other animals affected with or carrying the infection of certain contagious, infectious or communicable diseases.

CRYSTAL CRESYLIC DISINFECTANT is a permitted disinfectant for use in official disinfection.

DILUTION  
ADD AT LEAST 4 FLUID OUNCES  
TO 1 GALLON OF WATER

**WARNING: DO NOT GET IN EYES, ON SKIN, OR ON CLOTHING.**

### ACTIVE INGREDIENTS

Cresylic Acid .....	50% Min.
Soap .....	25% Min.

### INACTIVE INGREDIENTS

Water and Isopropanol .....	25% Max.
-----------------------------	----------

# POISON

May be fatal if swallowed or absorbed through skin. May produce severe burns. Wash thoroughly after using.

### ANTIDOTES

INTERNAL: Give raw egg white, milk, mucilage of acacia, gruel or cornstarch paste. Follow with an emetic (tablespoonsful of mustard in a tumbler of water about body temperature).

EXTERNAL: Flood with water and bathe with diluted alcohol or whiskey. Following this, apply a bland oil (either olive, cottonseed or linseed).

(CALL PHYSICIAN)

**WARNING: KEEP OUT OF REACH OF CHILDREN.**
