

DIRECTIONS FOR USE

For use in water-cooling towers for control of algae and slime, add $\frac{1}{4}$ to $\frac{1}{2}$ pint per 1,000 gallons of contained water as often as required by visual inspection, generally once per week in summer, less frequently in winter.

Treated effluent may be harmful to fish and other aquatic life. Keep out of ponds, lakes, and streams.

Do not add to water supplies that may be used for drinking purposes.

Rinse empty container thoroughly with water and discard it.

CAUTION

Avoid contact with skin and eyes. In case of contact, flush with water for at least 15 minutes and get medical attention.

Harmful if swallowed.

KEEP OUT OF REACH OF CHILDREN.
