# FLY SPRAY LIQUID

## DIRECTIONS

To kill flies, mosquitoes, gnats, bees, fireflies and other flying insects: Spray directly on insects or fill room with mist by closing doors and windows and shutting off any ventilating fans. Spray for 10 to 15 seconds for an average room. Keep nozzle at least 3 feet from all surfaces. Keep room closed at least 15 minutes after spraying. Repeat applications as needed. Do not re-entr in treated areas and ventilate the areas after treatment is completed.

To kill bedbugs: Spray mattresses and springs thoroughly especially around seams and tufts. Spray bed-boards and floor boards.

To kill fleas, larvae and destroy pet's bedding, spray sleeping quarters freely, force the spray into all cracks in floor and about quarters. Replace bedding after each treatment. **DO NOT USE ON PETS.**

To kill roaches, waterbugs, silverfish, crickets, ants and centipedes: Spray around baseboards, under table legs, under chairs and openings around sills and pipes. Spray out trails and areas around the door sills and window frames where the pests enter the premises. Repeated applications are required in all cases. Mix as many insects with the spray as possible.

### For De-Mothing

Note: Moth eggs are deposited underneath the fabric away from the light and in undisturbed places. They mature in 4 to 8 days into the larva, which is the most damaging and destroys materials such as wool, fur, feathers and hair.

**CAMEL BEETLES** are nested in the nap and weave of woolen rugs. **TOY BUGS** are found in the tow or filling of upholstered furniture. Grease, body perspiration, food products, cause grease spots which attract these insects. These spots are easily removed with De-Moth.

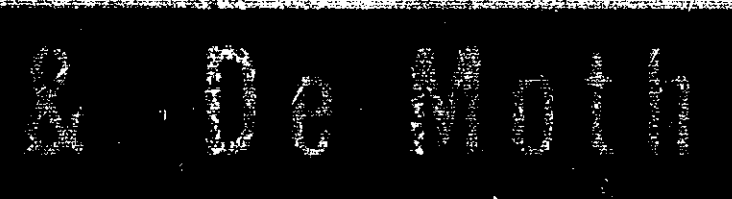

E.P.A. Reg. No. 892-22

### 100% ACTIVE INGREDIENTS

- 0.10% Pyrethrins
- 0.20% Technical Piperonyl Butoxide\*
- 0.20% N-octyl Bicyclohexane Dicarboximide
- 0.27% Perfume
- 99.23% Petroleum Distillate and Perfume

100.00% TOTAL

\*Consists of 0.16% (butylcarbityl) (4-propyl-1 piperonyl) ether and 0.04% other related compounds.

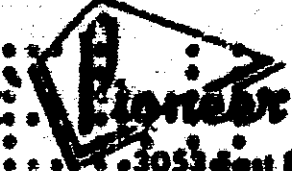

## CAUTION

**KEEP OUT OF THE REACH OF CHILDREN  
HARMFUL IF SWALLOWED  
Do Not Induce Vomiting or Grogging  
CALL PHYSICIAN IMMEDIATELY**

**DO NOT USE, POUR, SPILL OR  
STORE NEAR HEAT OR OPEN  
FLAME.**

Read Additional Caution Statement,  
Right Side Panel, Before Using.

Net Contents: 1 Gallon

# DIRECTIONS:

## UPHOLSTERED FURNITURE

Secure a good Air Compressor and Spray or Hypodermic Sprayer with a 1/8" Hypodermic Needle attached. Insert needle at various points to reach all portions to be demothed. Pay particular attention to seams, folds, buttons. After thorough inside treatment, remove needle from Sprayer and thoroughly spray the outside material, again paying particular attention to seams and folds. Do not stand more than one foot away from material. Follow up every 30 days where cases warrant.

## Cleaning Rugs and Upholstered Furniture

1. Vacuum clean and remove dust thoroughly. 2. Spray De-Moth over entire surface. 3. Pour De-Moth into shallow pan. 4. Dip small hand brush into fluid. 5. Scrub and clean thoroughly, using backward and forward motion. 6. Rub dry with Turkish toweling.

De-Moth will not affect the color or rug sizing and will not cause stretching.

**CAUTION:** Do not spray on pets, humans, vegetation, food and food containers. Remove all pets and vegetation from rooms before spraying. Avoid inhalation. If skin becomes contaminated, wash area immediately with soap and water. For clothing: Remove immediately and wash clothing before re-using, wash affected skin area. Do not reuse empty drum or cans. Return drum to reconditioner or destroy drum or can by perforating or crushing and bury in a safe place.

**KEEP OUT OF THE REACH OF CHILDREN**
