

A spectacularly efficient "liquid sweeping compound," put in the mop — not on the floor.

DIRECTIONS

INITIAL TREATMENT OF MOP. On a new or washed out mop, use ½ ounce compound for each inch of mop head length. Pour compound uniformly over entire length of mop head, allowing liquid to penetrate mop strands. Allow treated mop to cure overnight before using. Mop treatment provides bacteriostatic benefits to mops only.

USE. TREATED MOPS SHOULD BE USED TO REPLACE BRUSHES OR PUSH BROOMS FOR DAILY SWEEPING. Push mop over floor, moving rubbish and waste ahead of it, and thoroughly absorbing all dust and fine soil into the mop. For best results, MOP SHOULD NEVER BE SUFFICIENTLY WET TO DEPOSIT VISIBLE COMPOUND ON THE FLOOR.

DAILY MOP TREATMENT. Shake out loose soil from mop. Treat with 2 ounces compound for every 8 inches of mop head length. Allow mop to cure overnight, ready for next day use.

CARE OF MOP. After sweeping with treated mop, shake out excess soil from mop. When necessary, mop can

DIRECTIONS (continued)

be completely cleaned, without removing from handle, by thoroughly rinsing under water-faucet. Press out excess water and allow mop to dry thoroughly before re-treating for next use.

FOR FURNITURE AND PAINTED SURFACES: Dip cloth in compound, wring out excess. Rub thoroughly over surface to be cleaned and polished. Polish to a bright finish with a clean, soft, dry cloth.

MAY BE USED ON LINOLEUM, RUBBER, ASPHALT, TILE, TERRAZZO, MARBLE, WOOD, PAINTED SURFACES, PLASTIC AND OVER WAX.

Use Sparingly As Directed For

CAUTION

harmful if swallowed.

Some skins may be sensitive to the disinfecting agent. Do not immerse hands in it. If irritation is noted, remove hands from solution. Wash with soap and water. Apply hand lotion or cream. Avoid contamination of foodstuffs. Do not get in eyes. In case of contact, flush with plenty of water. If irritation persists, get medical attention.

Rinse empty container with water and discard it.
