OPERATING INSTRUCTIONS

OPERATING INSTRUCTIONS:

1. Remove protective cap.
2. Holding dispenser upright, point valve in desired direction and press dispensing button to spray. Hold at least 2 feet from all objects.
3. Close room before spraying; leave closed and unoccupied for 10 - 30 minutes afterwards.
4. Avoid excessive spraying toward light walls and other easily stained surfaces.
5. Bomb will operate about 9 minutes. Count one second, two seconds, three seconds, etc. to prevent waste. Do not turn upside down.

ADULTS, FLIES, WASPS: Spray with upward motion of arm 10 to 12 seconds per 1,000 cu. ft. (10' x 10' x 10') walking around room to spread mist, filling room with spray.

ANTS, BEES, TERMITES, WASPS, HOLOGRAPHIC, FLYING MANTIS: Spray thoroughly enveloping the insects with mist. Aim spray at ceilings, ant runways, wasp nests. Spray rugs, furniture, floors, animals sleeping quarters, wherever flies are suspected. Repeat as necessary.

COCKROACHES, HONEYBEES, CRICKETS, GRASSHOPPERS, LICE, SPIDERS and certain other crawling insects: Direct spray at cracks and crevices. Open drawers and cabinets, move contents to reach insects with mist. For roaches also spray undersides of tables, and in damp places, as around sinks, bathtubs, drains in basements, corners, etc. When roach infestation reached then, most insects will run out of their hiding places. When they appear, direct spray at them. For bedbugs, spray mattress folds and all parts of the bed, especially crevices; spray throughout room, particularly underneath and around edges. For carpet beetles, spray underside of rug and under feet. Alternatively, sprinkle lightly. Repeat as necessary.

SPIDER (P. ...)

ACCEPTED

MAY - 31968

UNDER THE FEDERAL INSECTICIDE ACT
 FOR REGISTRATION AND LABELING PURPOSES
 901-7 SUBJECT
 TO APPEAR IN THE FEDERAL REGISTER

[901-7]

ACTIVE INGREDIENTS:

pyrethrin	.001
Technical Piperonyl Butoxide*	.700
N-Octyl Bicycloheptene Dicarboximide	.400
Petroleum Distillate	2.699

INERT INGREDIENTS: 80.000

*Equivalent to .536% (butylcarbitol)(4-propylpiperonyl) ether and .144% other related compounds.

Inert ingredients consist of:

.500% Inoval 9-5	(Product is made using MOC Pyrethrin Intermediate #661 MCA Reg. No. 1001-754. The emulsifiers are provided in this intermediate.)
1.000% Emulsifiers	
52.500% Deionized Water	
35.000% Isobutane	

CAUTION: Keep out of reach of children. Contents under pressure. Do not place on hot surface. Do not puncture the can. Never throw in fire or incinerator. Cover or remove fish bowls for one hour. Cover exposed food and utensils. This product can be used safely around food and utensils if they are protected from direct contact during spraying. May stain finished surfaces if sprayed too closely.

DO NOT MIX WITH OTHER PESTICIDES - excessive spraying is wasteful.
