CAUTION: Keep Out of Reach of Children See Other Precautions on Back Panel

(Remainder of CAUTION message to be in 6 pt type)

**BACK PANEL**

**Directions for use**

Skin application for mosquitoes, biting flies, gnats, and fleas. Shake about 12 drops into one hand, rub hands together, and apply thoroughly in a thin layer to all areas of exposed skin, such as in washing. Sufficient repellent should be applied to give a uniform film. **APPLY WITH CAUTION AROUND EYES AND MOUTH.**

Clothing treatment against biting flies, chiggers (mites), fleas, and ticks. When clothing cannot be impregnated with bulk repellent, apply by pouring a dozen drops into one hand, rub the hands together, and then rub lightly on the socks and other clothing. Make liberal applications along all openings of the clothing, such as inside the neck band and fly, and bottoms of trousers, and where clothing fits tightly as across the shoulders, elbows, hips, and knees. Repeat smearing process several times until about 2 ounces of repellent has been used. One treatment of clothing is effective for a week if repellent is not washed away. Clothing may be treated several days before wearing. If irritation develops discontinue wearing treated clothing.

**FOR MATERIAL USE ONLY**

**CAUTION:** Harmful if swallowed. Avoid contact with eyes and lips. This material affects lacquer, paint, certain plastic articles, and some synthetic fabrics. Avoid smearing on goggles, watch crystals, painted helmets, etc.
