B. G. PRATT COMPANY, PATERSON, N. J.

Malathion is a highly effective insecticide which is safe for use on a wide variety of crops and ornamentals. It is particularly effective against sucking insects, such as aphids, mealybugs, and whiteflies, and against many other types of insects. Malathion is also effective against ticks and mites. It is a contact insecticide and acts quickly to kill insects. It is also a stomach poison and will kill insects that ingest it. Malathion is highly soluble in water and is easily applied to crops and ornamentals. It is also highly effective against insects that are resistant to other insecticides. Malathion is a safe and effective insecticide for use on a wide variety of crops and ornamentals. It is particularly effective against sucking insects, such as aphids, mealybugs, and whiteflies, and against many other types of insects. Malathion is also effective against ticks and mites.
