

NOCULATE SYSTEMIC SPRAY kills aphids, mites, thrips, whiteflies, leafhoppers, birch leaf miners and holly leaf miner on ornamental flowers, shrubs, and trees. **NOCULATE SPRAY** kills insects that come in direct contact with spray solutions. In addition, when **NOCULATE** spray solutions are applied to plant foliage, they are absorbed into the plant and kill sucking insects that feed on the plant sap.

NOCULATE SPRAY mixes readily with water and may be used in all types of sprayers. Applications should be made before insects appear or shortly after they are seen feeding on plant foliage.

In Compressed Air Sprayer: For use in hand or knapsack-type sprayers, add one (1) tablespoonful of **NOCULATE** Spray per gallon of water (1 to 250 dilution) and spray plants until they are thoroughly wet. Repeat as necessary to maintain insect control.

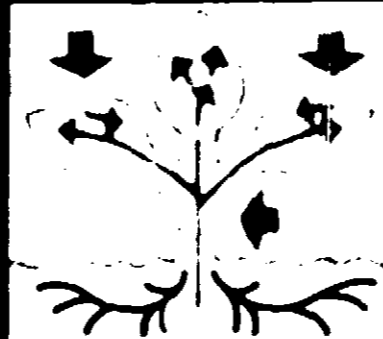

In Garden Hose Sprayer: For use in hose-end type garden sprayers, add one (1) tablespoonful of **NOCULATE** Spray for each gallon of final spray. For example: To prepare six (6) gallons of final spray, pour three (3) fluid ounces (6 tablespoonsful) of **NOCULATE** Spray into the sprayer jar and fill with water to the six (6) gallon mark. Spray plants until they are thoroughly wet. Repeat applications as necessary to
