• FLEAS • MILLIPEDES
• SPIDERS

CAUTION: KEEP OUT OF REACH OF CHILDREN

FLAMMABLE — CONTENTS UNDER PRESSURE

Read Precautions on Side Panel

NET WEIGHT: 11 OZ. AV.

Most bees and wasps are beneficial; however, when their nests are built too close to windows, door-ways, or children's play areas, they are dangerous and should be destroyed.

DIRECTIONS FOR USE

FOR CONTROL OF WASPS AND HORNETS: Apply after dark when all of the insects have returned to the nest. Aim valve opening at nest and depress button, soaking the nest with the spray. Repeat as necessary. Avoid wetting vegetation with this spray, as it will be damaged. Do not use as a space spray.

OTHER USES—OUTDOORS ONLY: For Control of Clover Mites, Crickets, Earwigs, Fleas, Millipedes; Sowbugs, and Brown Dog Ticks: Spray infested areas thoroughly including outside surfaces of screen frames, doors, window frames, foundations, patios or other places where insects may enter or harbour. **FOR ANTS,** spray hills and runways. Repeat as necessary. Do not spray vegetations. Do not use as a space spray.

FOR SPIDERS — OUTDOORS ONLY: Spray directly on spiders and treat webs and tracking areas around porches, under eaves along foundations similar outdoor areas. Repeat as necessary.

Spray may cause injury to flowers and ornamentals. Before using on easily stained surfaces, test a small spot before giving full treatment.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.

FIRST AID: If stung by a wasp, apply an icepack to the area of the sting, then apply a paste made with bicarbonate of soda and water. If stung many times or if the reaction is severe, call a physician.
