

[904-236]

CAUTION:

Harmful if swallowed. Remove spillage from skin and clothing with warm water and soap.

ENVIRONMENTAL CAUTION

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Do not reuse empty drum. Return to a drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

Mix formulation well in drum before use. Keep container closed when not in use. Store in a cool, dry place.

BUYER ASSUMES ALL RISKS OF USE, STORAGE OR HANDLING OF THIS MATERIAL NOT IN STRICT ACCORDANCE WITH DIRECTIONS GIVEN HEREWITH.

B.G.

**PRATT 25-5 ULV
MOSQUITO ADULTICIDE CONCENTRATE**

ACTIVE INGREDIENTS	BY WEIGHT
Pyrethrins	5%
*Piperonyl butoxide, technical	25%
Petroleum distillate	20%
Mineral Oil	50%
TOTAL.....	100%

*Equivalent of 20% (butylcarbityl) (6-propyl-piperonyl) ether and 5% other related compounds.

CAUTION:

KEEP OUT OF REACH OF CHILDREN.

SEE SIDE PANEL FOR ADDITIONAL CAUTIONS.

EPA Reg. No. 904-236

NET CONTENTS: 1 5 30 55 GALLONS

DIRECTIONS FOR USE

This formulation is to be used in mosquito adulticiding programs. Treat shrubbery and vegetation around residential grounds, recreational areas, and industrial grounds where mosquitoes may rest. Shrubby and vegetation around stagnant pools, marshy areas, and ponds may also be treated. Applications of this product to any body of water is prohibited.

Best results are obtained by application when there is a slight breeze of 5 miles per hour or less. Fog with the breeze so that wind will carry fog from roads or paths into the area to be treated. Repeat applications as needed to obtain desired reduction in adult mosquito population.

Pratt 25-5 Mosquito Adulticide Concentrate is formulated to be used without further dilution in truck-mounted ULV cold aerosol generators which produce spray in which the majority of the droplets are 5 to 25 microns. The objective is to treat terrain with .002 to .0025 pounds of pyrethrins and .010 to .0125 pounds of piperonyl butoxide per acre. Fog this solution with a discharge rate of 2 to 2.25 fluid ounces per minute while machine is moving at 5 mph and pressure is set at 3 lbs. per sq. in.. Discharge nozzle is positioned approximately 30° above horizontal off side of truck bed. Delivery rate and traveling speed can be varied slightly as long as the basic objective of .002 to .0025 pounds actual pyrethrins per acre is maintained. Use swath width of 300 feet for acreage calculations.
