

U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (WH-567) WASHINGTON, D.C. 20460	EPA REGISTRATION NO.	DATE OF ISSUANCE
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT	

NOTICE OF PESTICIDE: REGISTRATION
 REREГИSTRATION

(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Miller Chemical & Fertilizer Corporation
 P.O. Box 233
 Radio Road
 Emery, IA 52501

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 2(c)(2)(B) provided that you:

1. Submit and, if available, later amend for registration/reregistration your product under FIFRA section 2(c)(5) when the Agency receives similar registrant or similar product data.

2. Add the phrase "EPA Registration No. 044-41" to the label of the product for shipment.

3. Submit four (5) copies of your final printed label to the Agency to release the product for shipment. Refer to the A-79 label for a further description of final printed labels.

If these conditions are not complied with, the registration will be canceled. The Agency will advise you if the registration is canceled. If the product is not registered, you may not ship or sell the product.

Attach copies of the label to this registration file.

John W. Miller, Director
 Registration Management Division

CAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: CAUTION--Harmful if swallowed, inhaled or absorbed through the skin. Do not breathe dust. Avoid contact with skin, eyes or clothing. Wash thoroughly after using. Do not apply where children or pets are likely to come in contact with treated surface. Do not use this product in food areas of food handling establishments, restaurants or other places where food is commercially prepared or processed. Do not use in serving areas while food is exposed. ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store this product in its tightly closed, original container in a locked area away from children and domestic animals. Do not reuse empty container. For Disposal, securely wrap original container in several layers of newspaper and discard in trash, or at an approved waste disposal facility.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRATT ANT & TERMITE KILLER is a ready-to-use insecticide dust for residual pest control in, on and around buildings and structures and on modes of transportation. Permitted areas of use include, but are not limited to: houses, garages, trailers, campers, storage sheds, apartment buildings, stores, warehouses, industrial buildings, hospitals, restaurants, hotels, ships, railcars, aircraft, buses, and trucks. USE ONLY IN NON-FOOD AREAS.

APPLICATION: This product may be applied directly from a shaker, hand duster, paint brush or other suitable means to hiding and runway areas and those places where pests are found. The amount to be applied will vary with the site, but should usually be in the range of 1/3 to 2/3 ounces per square yard.

INDOOR USE

CARPENTER ANTS: Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Also force dust into infested wood through existing openings or newly drilled small holes. When possible locate and treat nests and surrounding areas.

TERMITES: Apply ANT & TERMITE KILLER to voids or channels in damaged wooden members of a structure, or to cracks, spaces or bearing joints between wooden members of a structure or between such members and the foundations, in locations vulnerable to termite attack. Drilling may be necessary prior to applying ANT & TERMITE KILLER to voids, cracks or joint spaces in vulnerable locations and to channeled sections of wood but it must be recognized that such drilling and treating of a timber in place may not result in complete coverage of infested and vulnerable voids or galleries.

The purpose of such applications of ANT & TERMITE KILLER is to kill termite workers or winged reproductive forms which may be present in the treated channels and spaces at the time of treatment and to impart a temporary resistance at these places to termite attack which may aid, in some part, in the prevention of immediate reinfestation by termites. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement, particularly where use of other insecticides may pose an odor problem.

COCKROACHES, ANTS, CRICKETS, SILVERFISH, SPIDERS, FLEAS & BROWN DOG TICKS: Apply thoroughly to all areas where these pests crawl and hide, especially in cracks and crevices and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves and in attics and crawl spaces. For ants, apply to ant trails, around doors and windows and other places where ants enter premises. To control the source of your flea infestation, treat your pets with a product registered for application to animals.
