DIRECTIONS FOR USE

Spray the empty storage bins thoroughly, using 1 gallon per 500 sq. ft. of bin surface. Treat the walls, ceiling, floor, around windows and doors, and the outside bin surfaces at all cracks, crevices and openings. Bin surfaces should be free of debris and grain residue before spraying. Allow at least 24 hours for spray to dry before adding grain to the bin.

KILLS: these insects which normally infest and damage stored grain. It also provides a long-lasting residue on the clean grain bin surfaces to kill insects which contact it. Co-op Grain Bin Spray is an aid in preventing insect infestation of stored grain from the cracks and crevices of the bin.
