

# CO-OP<sup>®</sup>

## DIRECTIONS

**Face Flies:** To protect cattle from face flies use a hand sprayer, mist type, to spray animal's head (cheeks, muzzle and forehead) thoroughly, each morning during fly season. Use no more than one ounce to treat entire animal at one spraying.

**Horn Flies, Stable Flies, House Flies and Mosquitoes:** Use a sprayer for good distribution and animal coverage. Deposit a fine mist over the animal's back and withers. Use on dairy cattle, beef cattle, hogs, and horses. For best results, spray cattle before each milking, night and morning.

Apply one (1) ounce per animal per spraying, on beef cattle, dairy cattle and horses, one-half (1/2) ounce per animal on hogs, for 7 to 10 days. Thereafter, treat as above when flies and mosquitoes re-appear. Wash teats and udder before milking.

**CO-OP Dairy Cattle Spray** is formulated with a fogging oil base for good distribution.

Do not re-treat, by fogging, animals which have received a direct spray application within 8 hours.

**For Fleas:** Spray bedding and sleeping quarters where infested animals are housed. Use 1 ounce per 200 sq. ft. of surfaces. Repeat if necessary.
