939-2

A ready-to-use pyrenone* spray that combines "quick knockdown" and residual effectiveness against exposed stages of confused flour beetle, cadelle, saw-toothed grain borer and a variety of grain moths and grain mites, with ~~relatively complete safety to warm-blooded animals.~~

DIRECTIONS:

Spray walls, floors, milling machines, box cars and grain bins at a rate of 1/2 to 1 gallon per thousand square feet of area. ~~Despite its contact effect on warm-blooded animals,~~ It should not be sprayed directly on food. Repeat application as often as necessary. Do not spray near or toward an open flame.

[Faint, mostly illegible text at the bottom of the label, likely containing manufacturer information and contact details.]
