5% CHLORDANE

KILLS ANTS AND JAPANESE BEETLE GRUBS

DIRECTIONS

LAWN AND TURF—To control Japanese Beetle Grubs, Lawn Ants, Mole Crickets and White Grubs—Use 5 lbs. 5% Chlordane per 1000 square feet of lawn. Apply approximately 2 weeks before beetles emerge in your area. Also apply on Lawns and Turf again in Fall. Liberal watering after application carries the poison into the soil and spreads it.

NOTE: Keep children and animals off of treated areas until the material has been thoroughly washed into the soil and the treated areas have dried completely. Birds feeding in treated areas may be harmed. Do not graze treated area.

ANTS AND ROACHES—Apply 5% Chlordane into cracks, burrows, tunnels and nests where pests multiply and travel. Repeat applications as necessary.

INDOOR USE—To control Ants, Roaches, Waterbugs, Silverfish, Crickets, Spiders, Centipedes, Box Elder Bugs, Dog Ticks—Thoroughly dust places where insects congregate, crawl or hide, such as cracks, crevices, baseboards, window and door frames, insect runways and sleeping quarters of pet. Repeat as necessary. Place fresh bedding in animal quarters following treatment. Do not treat pets or other animals.

CAUTION

Harmful if swallowed. Contact with skin causes irritation. Avoid breathing dust. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Do not use in public or private areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in areas where food is exposed.

Do not use on and wildlife. Do not contaminate ground water. Keep out of streams, ponds. Do not use in lawns. Do not dump or dispose of wastes. Do not reuse container. Destroy when empty.
