## CHINCH BUG CONTROL

Lawn chinch bugs have become one of the most troublesome and damaging pests of ornamental turf.

These small sucking insects feed on the juice in leaves and stems of grass, causing yellowish patches that rapidly brown. These patches grow in size as chinch bugs increase in numbers. During warm weather, population can increase so rapidly that your lawn can be destroyed within weeks.

### SPREADER SETTINGS

Lawn Beauty .....	9½	Central .....	8
Modern .....	8	Queen Turf .....	8
Sears .....	8	Jackson .....	8
Cyclone .....	5	Scott .....	9

**NOTE:** Above spreader settings are approximate. Check your spreader on 100 sq. ft. and adjust to apply only 5½ oz. per 100 sq. ft. Rate of walk, moisture and spreader condition can vary the spreader setting necessary to apply the correct amount.

### DIRECTIONS

Apply 3½ lbs. of LEBANON CHINCH BUG CONTROL per 1000 sq. ft. of lawn and water thoroughly. Do not allow persons or pets on treated lawn until thoroughly dry.
