GREEN GOLD
PRE-EMERGENCE
CRABGRASS CONTROL

WEEDS CONTROLLED

DIRECTIONS

LAWNS

Apply to lawns in early fall or early spring before crabgrass seeds germinate. Apply evenly to the lawn surface. Water thoroughly after application. Do not mow for 2 weeks after application. For best results, apply to lawns that are well maintained and free of weeds.

PRE-EMERGENCE
CRABGRASS CONTROL

CAUTION:

GREEN GOLD

LAWNS:

Spring Application: Apply GREEN GOLD CRABGRASS CONTROL at rate of 1 lb. per 1000 sq. ft. early in spring before grass and other annual grasses and weeds get into full growth. One application before lawn is established will control the entire season. If application is made on a new lawn, pre-seed application should be made before the grass is established. For best results, application should be made during the dormant season, i.e., late fall or early spring. For more information on GREEN GOLD CRABGRASS CONTROL, see the literature.

CAUTION: This product is highly toxic to fish, birds, and other animals. Do not apply to lawns near water. Do not apply to lawns near water. Do not apply to lawns near water.
