EVER PREN
WEEDS AS IT FEEDS EVERGREENS

FOR EVERGREENS AND AZALEAS

This two-way product (1) feeds with a 12-16-8 plant food, specially formulated for acid-loving plants and shrubs, (2) prevents broadleaf and grassy weeds* from getting started in planting beds. Safe for established evergreens and shrubs. Do not apply to Ajuga, Myrtle, Pachysandra, and other ornamental groundcovers as injury may result.

Apply in spring as evergreen and shrub growth begins and before weeds sprout. For best results, follow these directions carefully.

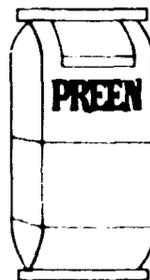

1. Before applying, remove all existing broadleaf and grassy weeds since product kills sprouting weeds, not established weeds.
2. Spread EVER PREN evenly. Avoid missing small areas since weeds will grow in spots not covered. A trowel, coffee can, or scoop makes spreading easier.
3. Apply so soil is lightly covered, as shown at right. This equals $\frac{3}{4}$ pound per 125 sq. ft. of area to be treated. An empty one pound coffee can will hold about $\frac{3}{4}$ pound of EVER PREN.
4. For best weed control and proper plant feeding, make a second application 4 weeks after first application. Weed control is increased by lightly raking EVER PREN into soil immediately after application.
5. After application, sprinkle shrubs lightly with water to remove any of the product from foliage.

*WEEDS CONTROLLED: Crabgrass, Barnyardgrass, Foxtail, Johnsongrass, Ironweed, Goosegrass, Annual Bluegrass, Sunkgrass, Bromegrass, Junglerice, Sprangletop, Great Pigweed, Spiny and Redtop, Canada Weed, Lambsquarters, Carpetweed, Russian Thistle, Kochia, Purslane, Florida Purslane (Paspalum), Knotweed, String Nettle, Goosefoot, Chickweed, Plantain, Texas Panicle, Sandbar.
