# Crabicide Green™

## CRABGRASS PREVENTER PLUS LAWN FERTILIZER

KEEPS OUT CRABGRASS, CLOVERGRASS, FOXTAIL, BARNYARDGRASS, and other weeds by effectively killing the sprouting seeds. Contains BALAN™ weed preventer and fertilizer. Contains 100% 0-10-10 Fertilizer.

GREENS AND THICKENS LAWN with quality lawn fertilizer. Contains as much green-keeping power per square foot as GREEN POWER.

One application in spring stops crabgrass before it starts. This product will not damage established bluegrass, ryegrass, fescue, zoysia, bermuda, St. Augustine and centipede grass turfs when applied as directed. Do not apply to new grass planted the previous fall. Instead, use Greenfield TREBU™. Do not apply to bentgrass or dichondra, or to newly sprigged areas of bermuda, St. Augustine or centipede grasses.

**WHEN TO APPLY:** Apply CRABICIDE GREEN in the spring before crabgrass germinates. If you plan to re-seed, wait 6 weeks after application. The contents of one BAG OF CRABICIDE GREEN may thicken grass enough to reduce or eliminate re-seeding.

**HOW TO APPLY:** For best results, CRABICIDE GREEN must be applied evenly over your lawn without clumps or missed spots. Determine the coverage of your spreader. Do not over-apply. Apply the contents of one bag for every 5000 sq. ft. of lawn area. For example, a 100' x 100' lawn measures 100 ft. x 100 ft. = 10,000 sq. ft. Two bags are sufficient.

1. Shut the spreader's discharge chute down. Scoop the contents of half a bag into the hopper. Spread the half of the required amount over your lawn, moving at a steady rate in one direction.
2. Spread the other half of the required amount over the lawn in a second direction, making a right angle to the first application. This minimizes skips and overlaps, insuring best coverage. When using a hand-cranked spreader, close spreader gate.
3. Adjust the spreader's discharge chute to precisely apply the product to the lawn. Use the One Step settings for best results. Re-spread the remaining half of the bag over the lawn in a second direction, making a right angle to the first application.

## SPREADER SETTING

The Recommended Spreader Setting is given in the table below. For best results, use the spreader setting as directed above. In addition, One Step™ settings should be used. When using a hand-cranked spreader, close the spreader gate. If your spreader has a discharge chute, adjust it to precisely apply the product to the lawn.

Model	Recommended Spreader Setting		Recommended Spreader Setting	
	Hand-Cranked	Power-Driven	Hand-Cranked	Power-Driven
GREENFIELD Model 105	5 1/2	5 1/2	5 1/2	5 1/2
Lawn Beauty	5 1/2	5 1/2	5 1/2	5 1/2
Supers	5 1/2	5 1/2	5 1/2	5 1/2

**GREENFIELD "YARD WIDE" GUARANTEE: ELANCO GUARANTEES YOU WILL BE SATISFIED WITH THE PERFORMANCE OF THIS FINE PRODUCT, WHEN USED AS DIRECTED, OR YOUR MONEY BACK. SIMPLY SEND EVIDENCE OF PURCHASE TO ELANCO PRODUCTS COMPANY AT THE ADDRESS SHOWN BELOW.**

For a greener lawn

2. Spread the other half of the required amount over the same area moving across or at right angles to the first application. This minimizes skips and overlaps (insuring good coverage). When turning or stopping spreader, close spreader gate.  
 3. Where this two step procedure is not practical, apply this product in one trip over the lawn using the One Step settings listed below. Be careful to cover lawn completely, so even grass can grow in spots which are missed.

## SPREADER SETTING

The Recommended Settings are based on a rate calculated to apply 1 lb. of fertilizer per 1000 sq. ft. of lawn at a half rate as directed above. In addition, One Step settings are listed for use where only one application is made over the lawn. Check application rate of your spreader before applying product to determine actual application rate.

Spreader	Recommended		Recommended	
	One Step	Two Step	One Step	Two Step
GREENFIELD Model 105	5 1/2	10	10	20
Lawn Beauty	5 1/2	10	10	20
Scars	5 1/2	10	10	20

**GREENFIELD "YARD WIDE" GUARANTEE: ELANCO GUARANTEES YOU WILL BE SATISFIED WITH THE PERFORMANCE OF THIS FINE PRODUCT, WHEN USED AS DIRECTED, OR YOUR MONEY BACK. SIMPLY SEND EVIDENCE OF PURCHASE TO ELANCO PRODUCTS COMPANY AT THE ADDRESS SHOWN BELOW.**

# For a greener lawn

**GREEN POWER** is a specially developed high-nitrogen lawn food that will build and maintain a truly luxuriant and superior lawn.

**GREEN POWER** can be applied any time during the growing season and provides sustained feeding without burning when used as directed.

**GREEN POWER Builds Beautiful Lawns**

**CAUTION:** May be harmful if swallowed. Avoid contact with skin or eyes. Avoid breathing dust. Avoid contamination of foodstuffs or feeds. Wash thoroughly with soap and water after using.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

The manufacturer warrants that this product is free from adulteration and that it contains the ingredients and amounts stated on the label. The manufacturer does not warrant that the product will perform as advertised. A refund may be obtained if the product is found to be adulterated or if it does not perform as advertised.

Do not reuse container. Destroy when empty.

# Trebl

CRABGRASS KILLER / FERTILIZER

CONTROLS THESE GRASSY WEEDS: Crabgrass, Foxtail, Barnyardgrass—by effectively killing the sprouting seeds

### USE WHEN SPRING SEEDING—APPLY BEFORE CRABGRASS GERMINATES

1. Apply after spring seeding of new lawns or reseeding of bare spots in established lawns. After application provide sufficient moisture to insure germination of new grasses.
2. Can be used on bluegrasses, fescues, ryegrass, Poa and the following strains of bentgrass: Perennecross, Sea-side, Highland, Astoria, Nimisila, C-1, C-7 and C-19.
3. Do not use on other bentgrass strains or on Bermuda grass as injury to turf may result. Do not use on food crops.

**HOW TO APPLY—** For best crabgrass control, TREBL must be applied evenly over your lawn without skips or misses. Determine the correct amount for your lawn area. Do not over apply or under apply. Apply the contents of one bag to every 2500 sq. ft. of lawn area (for example, 50 ft. x 50 ft. = 2500 sq. ft.). If your lawn measures 50 ft. x 100 ft. (or 5000 sq. ft.), 2 bags are sufficient.

1. Using the Recommended Setting below, calculate to apply at one-half rate. Spread one-half of the required amount of TREBL for your lawn, moving at a steady rate in one direction.
2. Spread the other half of the required amount over the same area moving at a steady rate right angles to the first application. (This minimizes skips and overlaps, insuring good coverage.) When turning, completely close spreader gate.
3. Where this two-step procedure is not practical, apply in one trip over the lawn using the One-Step settings listed below. Be careful to cover lawn completely, since crabgrass can grow from seeds which are missed.

### SPREADER SETTINGS

The Recommended Settings listed below are calculated to apply TREBL at one-half rate. In addition, One-Step settings are listed for use with rotary-type spreaders. These settings are approximate. Check application rate of your spreader before use, and adjust rate as necessary with a test condition of spreader.

Spreader	Recommended		Application Rate
	Two-Step	One-Step	
GREENFIELD Model 105	6 1/4	4	1/2 lb. per 1000 sq. ft.
Lawn Beauty	5 1/2	4	1/2 lb. per 1000 sq. ft.
Sears	4	4	1/2 lb. per 1000 sq. ft.

**GREENFIELD "YARD-WIDE" GUARANTEE:** ELANCO GUARANTEES YOU WILL BE SATISFIED WITH THE PERFORMANCE OF THIS FINE PRODUCT, WHEN USED AS DIRECTED, OR YOUR MONEY BACK. SIMPLY SEND EVIDENCE OF PURCHASE TO ELANCO PRODUCTS COMPANY AT THE ADDRESS SHOWN BELOW.
